NEWDOCK

We are the answer to an ever-increasing demand for logistics real estate assets adapted to the future.

A future in which innovation, technology, sustainability and respect for the environment at the service of the client will be the essential requirements for any asset.

Newdock was born with the aim of helping its clients to compete in the new reality of the logistics real estate sector.

Newdock is a logistics management and investment platform focused on developing and managing state-of-the-art logistics spaces in Europe with special interest in Spain, Portugal, France, and Italy for clients and entities, owned by Goldman Sachs Asset Management.

Company

Investment, Asset Management, Design, Construction, Sustainability and Legal

Newdock is formed by a team from the real estate world with extensive experience in the industrial and logistics sectors. This differentiating factor allows Newdock to offer in-depth knowledge of the market and a real perspective on its evolution and trends.

MISSION, VISION AND VALUES

01

Our mission

Develop logistics assets adapted to the most demanding needs, while respecting the environment and anticipating market trends.

02

Our vision

Be one of the largest generators of new logistics projects and to become the leading partner in logistics real estate solutions. Always from an innovative, technological and sustainable perspective.

03

And our values

A strong commitment to technological innovation, social and environmental sustainability and the agile development of complex structures. Always based on an honest and transparent relationship with our clients.

COMMITMENT

All our projects ensure the highest levels of social and environmental sustainability

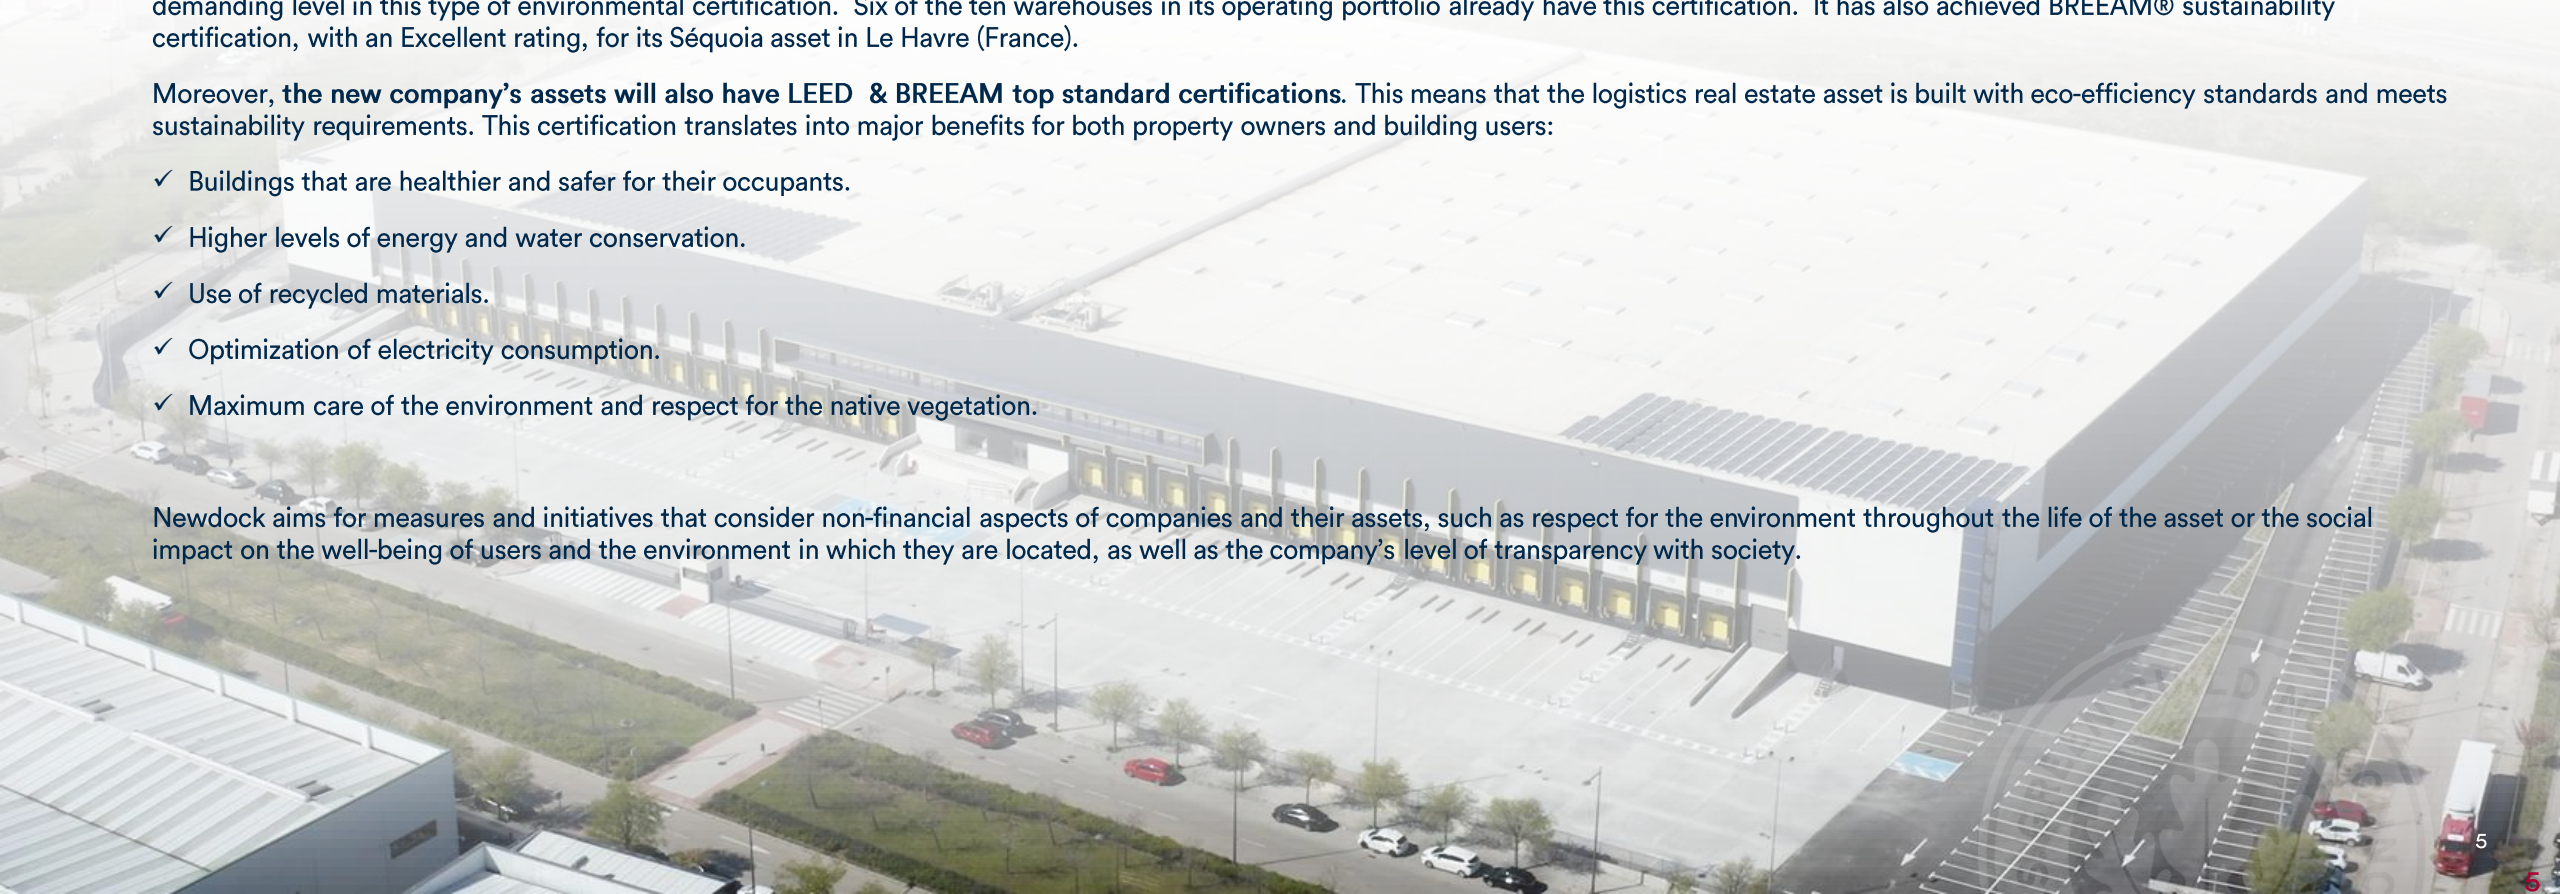

Newdock adopts respect for ESG (Environmental, Social, and Governance) values as the central pillar of its business approach. As of September 2024, Newdock is a B Corp Company. Being a B Corp company means that it complies with B Lab's high standards of social and environmental impact, with continuous improvement processes. These companies become part of a global community that work collectively for systemic change.

Newdock has become Europe's largest real estate manager of logistics assets with LEED® Platinum certification in its category of Warehouses and Distribution Centers, which is the most demanding level in this type of environmental certification. Six of the ten warehouses in its operating portfolio already have this certification. It has also achieved BREEAM® sustainability certification, with an Excellent rating, for its Séquoia asset in Le Havre (France).

Moreover, **the new company's assets will also have LEED & BREEAM top standard certifications.** This means that the logistics real estate asset is built with eco-efficiency standards and meets sustainability requirements. This certification translates into major benefits for both property owners and building users:

- ✓ Buildings that are healthier and safer for their occupants.
- ✓ Higher levels of energy and water conservation.
- ✓ Use of recycled materials.
- ✓ Optimization of electricity consumption.
- ✓ Maximum care of the environment and respect for the native vegetation.

Newdock aims for measures and initiatives that consider non-financial aspects of companies and their assets, such as respect for the environment throughout the life of the asset or the social impact on the well-being of users and the environment in which they are located, as well as the company's level of transparency with society.

NEWDOCK ESG KEY GOALS

ENABLING CO2 NEUTRAL OPERATIONS

- ✓ ENERGY FROM RENEWABLE SOURCES (GREEN TARIFF)
- ✓ 100% ELECTRIC WAREHOUSES

ENERGY EFFICIENT FACILITIES

- ✓ LED LIGHTING SYSTEM
- ✓ ENHANCED COMMISSIONING OF THE ENVELOPE
- ✓ BMS

WASTE MANAGEMENT DURING CONSTRUCTIONS

- ✓ HIGH PERCENTAGE OF CONSTRUCTION WASTE DIVERTED FROM LANDFILL

WATER USE REDUCTION

- ✓ USAGE OF LOW CONSUMPTION FIXTURES AND FITTINGS (>50% OF REDUCTION)

- ✓ RAINWATER COLLECTION FOR IRRIGATION PURPOSES

HEALTH AND WELLNESS

- ✓ DESIGN ORIENTED TO ENABLE WELL CERTIFICATION (WELL 'READY' APPROACH)
